

JOIN THE FAMILY

Stienen works with a global network of partners: dealers and installers who market our systems. Together with our partners, we create the best automation solutions with a focus on animal welfare and technical results.

As a partner, you are the first point of contact for the end user. You benefit from reliable systems, strong brand recognition, and technical support that enables you to take your customers to the next level.

STIENEN 

FAMILY BUSINESS SINCE 1977

FUTURE-PROOF AGRI AUTOMATION

Take control. Gain insight. Grow smarter.

STIENEN AGRI AUTOMATION

Stienen is a leading family business (1977) with strong roots in intensive livestock farming. We are naturally very close to the end user. We supply innovative automation solutions for poultry and pig houses worldwide. Climate solutions, automation systems, management software, and associated peripheral equipment are all developed and produced in-house.

COMMITTED SINCE 1977

It all started in Michel and Corrie Stienen's shed, in the backyard of their former home in Nederweert-Eind. Here, Michel developed his smart solutions, which were quickly recognized as reliable and innovative.

To this day, we develop virtually everything in-house. That makes us unique and gives our customers the assurance of technology that works. Since 2017, Erwin Stienen has been at the helm as the proud CEO of the family business:

"We are proud of everything we have achieved so far. We look to the future of our company as a family business with confidence."

- Erwin Stienen

MISSION

Our mission is to provide **reliable** total solutions for farm automation, with **knowledge** and **commitment**, to our agricultural partners worldwide.

VISION

By deploying our **smart technologies**, innovations, and products, we ensure future-proof livestock farming with environmentally conscious, **animal-friendly**, and **efficient** food production.

OUR CORE VALUES

COMMITMENT

Commitment is the foundation of trust. When we agree to something, we deliver. We are always there for our partners and customers.

PERSONAL

Working together with attention and understanding. We understand that every customer is unique. That is why we always work on the basis of personal contact and mutual respect.

RELIABLE

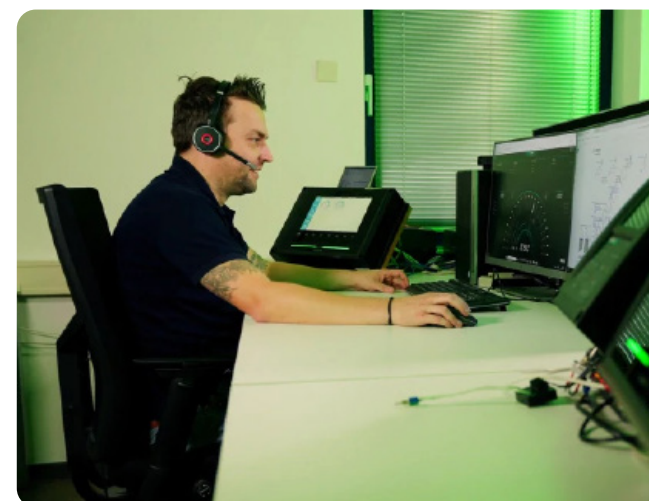

We are your long-term partner. As a family business, we stand for stability and trust. We build relationships that transcend generations.

CRAFTSMANSHIP

Since 1977, we have been combining technical knowledge with a keen eye for detail. With a strong R&D team, we are constantly working on the latest technologies.

IN HOUSE DEVELOPMENT AND PRODUCTION

Since 1977, we have been striving for high **quality** and sustainable solutions tailored to your needs. We like to stay in control ourselves to guarantee **reliability**.

24/7 SERVICE AND SUPPORT

We are ready to answer your questions. Whether you have technical questions or need advice on using our systems, our service team will provide you with fast, **personal**, and **professional** assistance.

WE ARE HERE FOR YOU.

GLOBAL IMPACT.
LOCAL ROOTS.

TOTAL SOLUTIONS FOR MODERN POULTRY FARMERS

Improve the welfare of your animals with an automated poultry house. Optimize the climate, feeding system, and more with our smart technologies. Our solutions work seamlessly together for optimal results.

FarmConnect Platform

Collect current and historical data from all control computers at your company and operate them remotely.

Control cabinets

We develop and build the control panels ourselves to ensure quality and reliability.

Farm Management

Climate and management computer with Next Generation technology, developed by our own R&D department.

FarmAlarm

Secure your animals with our user-friendly alarm system and smartphone app.

Sensors

To measure is to know. Choose from our extensive range of reliable sensors.

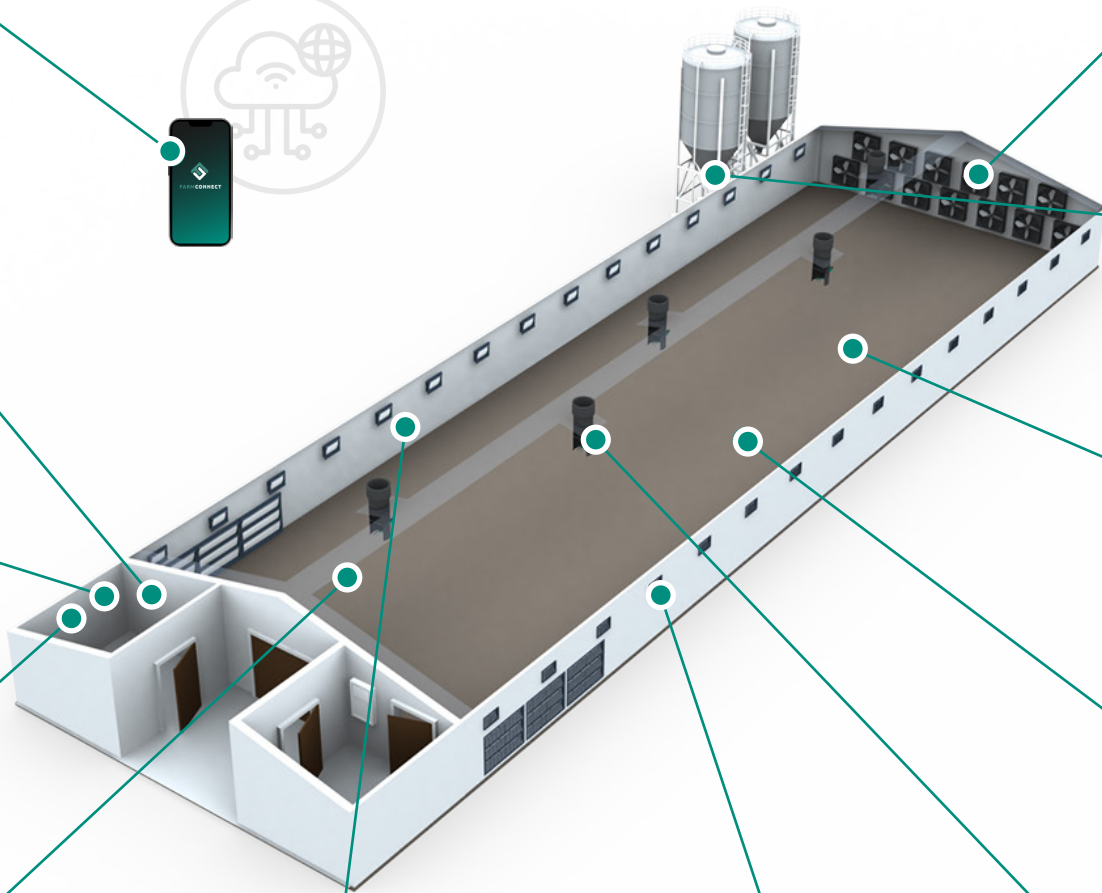

Motors

Our robust winch motors are ideal for controlling air inlets or curtains for long-term use.

Air inlets

Intelligently designed air inlets for even and reliable air distribution.

Ventilation

The right ventilation for every ventilation system, such as accurate measurement and control (AQC) or high-pressure fans (SGS) or more.

SmartFeed

Highly accurate feeding system for optimal cost efficiency. Manage silo stocks, mix and dose feed components.

SmartWeigh

This smart animal weighing system converts daily animal weighings into smart data.

SmartCollect

Automate the egg supply to your packing machine. Stay in control with accurate registration.

Ventilation chimneys

Seamless connection to the AQC and SGS impellers. With convenient click system.
