

BO-AIR-TOUCH-CL

CURTAIN CONTROL

For cattle farming

- Transparently arranged touch screen control
- Suitable for all types of curtain control
- 2 motors, directly connectable
- Possibility of circulation control
- Weather station connection option
- Heating and/or cooling control
- Future: remote operation via FarmConnect

Bo-Air-Touch-CL-L-EN24040

STIENEN 

Optimum ventilation

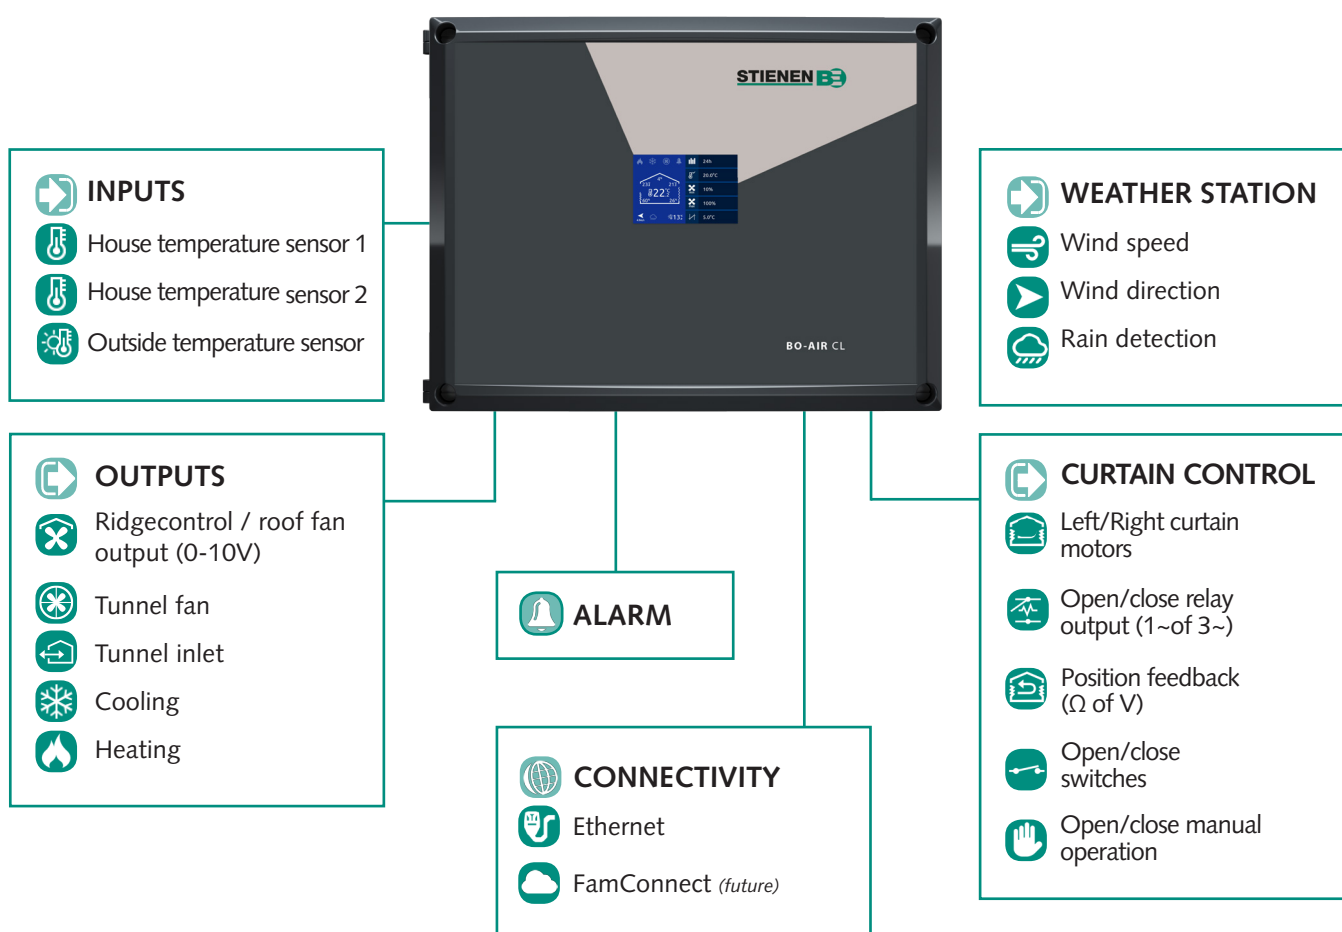

Optimum environmental conditions in animal houses call for optimum ventilation.

The new and innovative Bo-Air CL climate computer enables you to effectively control your curtains and ensure optimum fresh air flows in your animal house.

An optional weather station provides weather-dependent operation of your house curtains.

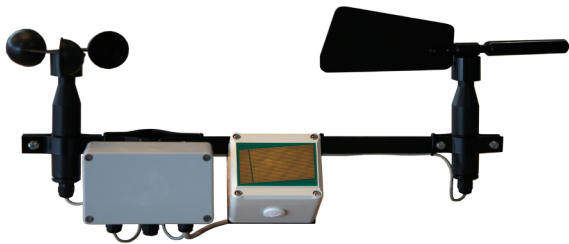

System features

Technical specifications

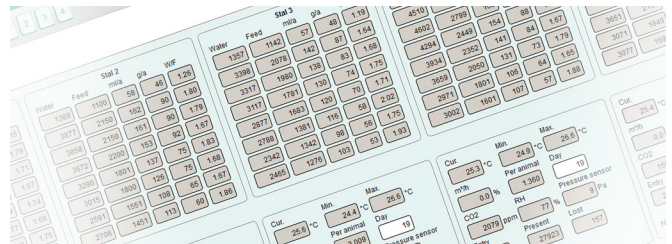

Analogue inputs	6	Supply voltage (in)	110Vac - 240Vac 50/60Hz
Analogue outputs	2	Supply voltage (out)	24Vdc / 12Vdc
Digital inputs	2	Ambient temperature	0 ... 45°C
Relay outputs	3	Quality mark	CE
Alarm outputs	✓	Housing	315 x 285 x 140mm (WxHxD)
Ethernet (RJ45) connection	✓		plastic ABS (IP54)

Weather station (optional)

Adding a weather station to your curtain controller enables you to instantly respond to current weather conditions and pro-actively adjust your curtain positions to ensure an optimum climate! The weather station data can optionally be shared with multiple controllers.

FarmConnect (future option)

The FarmConnect farm software collects all current and historical data of all control computers on your farm, combines this data, and then presents it in clear overviews, graphs and tables. FarmConnect gives you access to your farm data. Wherever you are, you are always connected to your company so that you can intervene immediately if necessary.

STIENEN AGRI AUTOMATION

Stienen Agri Automation is a leading family company (1977) which has its roots in livestock farming. It is in our nature to be very close to our end users. We are a global supplier of innovative automation solutions for poultry and pig houses. Our climate solutions, automation systems, management software and the accompanying peripheral equipment are all developed and produced in-house.
